IMPORTANCE OF CLEANLINESS

COMMERCIAL CLEANING IS AN INVESTMENT, NOT A COST.

We believe that commercial cleaning is an investment in your business. A clean, hygienic workplace keeps your employees healthy and productive; it ensures a good first impression for your clients; it protects you against regulatory risk; and it expands the lifespan of your equipment.

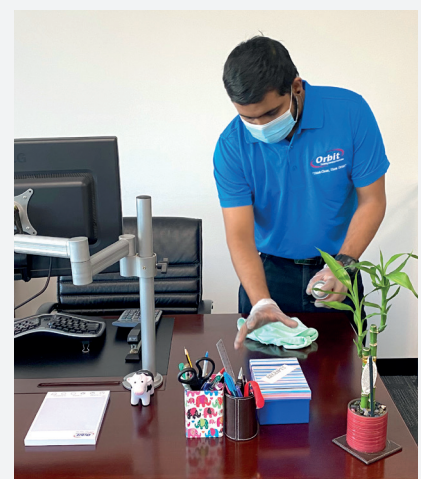

CLIENT IMPRESSIONS ARE EVERYTHING

Just like a clean office environment can markedly improve the mood of your employees, it most certainly has an impact on what clients think of your operation.

WORKING WITH ORBIT CLEANING SERVICES AUSTRALIA

At Orbit Cleaning Services Australia, we understand the importance of having a clean facility, and thrive off helping businesses make improvements. That is why we offer obligation-free commercial cleaning quotes.

STEAM CLEANING

Over the years Orbit's been around we've been fortunate enough to work with many great clients across all kinds of industries with all kinds of unique needs. Here's just a few of them...

DON'T TAKE OUR WORD FOR IT!

SYSTEMS AND TRAINING

Orbit Cleaning Services reflects the belief that high standards of cleanliness are best maintained by well-trained staff with clear systems and processes to follow. Our Staff and Training Policies reflect that belief.

Client Management System

Orbit Cleaning uses a custom Client Management System (CMS) to manage our client's cleaning schedules.

Online Induction:

In addition to our orientation and on-site training, we also have a comprehensive online induction program that all new hires need to complete. This induction ensures that our staff are all familiar with and aware of industry standards and requirements. Our online cloud based system is also used to deliver on-going training for changes in regulation, new machinery/equipment or rolling out new processes.

On-Site Training:

Every site has its own tailored variation of the process. The site systems and checklists ensure that tasks and processes are clearly spelled out, but we don't stop there. At every new site there will be a minimum level of supervision and training to ensure that everything is being done according to the requirements.

No magic spray or Certificate of Attendance can make up for experience.
